Dear Friends,

I wanted to pass along my words of support for the Kansas Logistics Park and growth opportunities for our State in the wind industry. The Kansas Logistics Park is an exciting project for the region and will help ensure Kansas continues to be a national leader in the area of logistics and manufacturing.

It is encouraging to see Newton and Harvey County leaders teaming up with other community leaders, including universities and industry, to create a project that will provide unique capabilities for the area. The willingness of the City of Newton and Harvey County to work together on this project as evidenced by the joint agreement shows a forward looking vision, especially in these challenging economic times. These superb skills and emphasis on innovation are what our State needs to continue to be a leader in manufacturing and wind energy related industries.

I want to extend my thanks to each community leader that is working on this project. I congratulate all of the participants for their involvement in creating a business friendly environment where manufacturing can thrive. Your leadership in helping businesses to expand and attracting new business opportunities and innovation is an inspiration to all of us.

Best wishes on continued success with this project!

Sincerely,

Sam Brownback
United States Senator
